

Website Accessibility Package

THE AMERICAN WITH DISABILITIES ACT (ADA) was enacted to prohibit discrimination against people with disabilities. Originally, this meant physical accommodations like ensuring wheelchair access. Now online digital spaces, aka websites, must also be accessible to all or could be at risk for a lawsuit. See our recent blog post for details [here](#).

Exclusively for our referral partners, now through May 31, 2020, aJuxt's Website Accessibility Package will increase your WordPress website's accessibility for only \$510. A savings of \$250.

Package Includes:

Installation of UserWay plugin

Page titles structure implemented

Alt text added to pictures (up to 25 images)

Contact Us Now to increase your site's accessibility for all users. Only 10 packages are available at this price.

Terms: Installation of the UserWay plugin will increase accessibility to your website but aJuxt Media Group doesn't and can't represent or warrant that it will make your website ADA compliant currently or in the future. Additional images will be billed at \$170 per batch of 25. Audio captions or transcriptions are also available for \$85/hour. WordPress websites only. Website must be fully updated to be eligible for special pricing.
